April 13, 2022: CYFS Summit on Research in Early Childhood

PRENATAL-TO-3 POLICY IMPACT CENTER

Research for Action and Outcomes

CYNTHIA OSBORNE, PH.D.
Executive Director, Prenatal-to-3 Policy Impact Center
Professor of Early Childhood Education and Policy
Vanderbilt University, Peabody College of Education and Human Development

Our Earliest Experiences Shape Our Lives

- All children deserve to be born healthy and raised in nurturing environments, with limited exposure to adversity
- Nurturing relationships in the earliest years lead to healthier brains and bodies, which influence health and wellbeing over the life course
- Chronic adversity harms children's neurological, biological, and social development, and can have lifelong consequences
- Millions of children lack the opportunities to the healthy start they deserve
- Children of color are most likely to face adversity and least likely to have the opportunities all children deserve

State Policy Choices Shape Opportunities

- State policy choices can empower parents and support children's healthy development
- We must care for the caregivers so that they can care for the children
- Systems of support require a combination of broad based economic and family supports and targeted interventions
- Variation in state policy choices leads to a patchwork of supports for families, depending on where they live

Eight Prenatal-to-3 Policy Goals

Families have access to necessary services through expanded eligibility, reduced administrative burden and fewer barriers to services, and identification of needs and connection to services.

Parents have the skills and incentives for employment and the resources they need to balance working and parenting.

Parents have the financial and material resources they need to provide for their families.

Children are born healthy to healthy parents, and pregnancy experiences and birth outcomes are equitable.

Parents are mentally and physically healthy, with particular attention paid to the perinatal period.

Children experience warm, nurturing, stimulating interactions with their parents that promote healthy development.

When children are not with their parents, they are in high-quality, nurturing, and safe environments.

Children's emotional, physical, and cognitive development is on track, and delays are identified and addressed early.

NEBRASKA

State Prenatal-to-3 Outcome Measures

Policy Goal	Outcome Measure	Worst State		Best State	Rank
Access to Needed Services	% Low-Income Women Uninsured	47.8%	26.3% NE	3.8%	36
	% Births to Women Not Receiving Adequate Prenatal Care	24.9%	13.0% NE	5.1%	17
	% Eligible Families with Children < 18 Not Receiving SNAP	26.7%	5.6% NE	2.0%	14

Prenatal-to-3 State Policy Roadmap

- **Core Principles**
  - Grounded in the science of the developing child
  - Committed to promoting equity
  - Guided by the most rigorous evidence, to date
- **Purpose**
  - A guide for state policy leaders to develop and implement the most effective investments that states can make to empower parents and ensure all children thrive from the start
- **Approach**
  - Identified 5 effective policies and 6 effective strategies that positively impact PN-3 outcomes
  - Tracking annual state progress toward policy adoption and implementation of the 11 solutions
  - Monitoring the wellbeing of infants and toddlers in each state, and progress toward reducing disparities in opportunities and outcomes

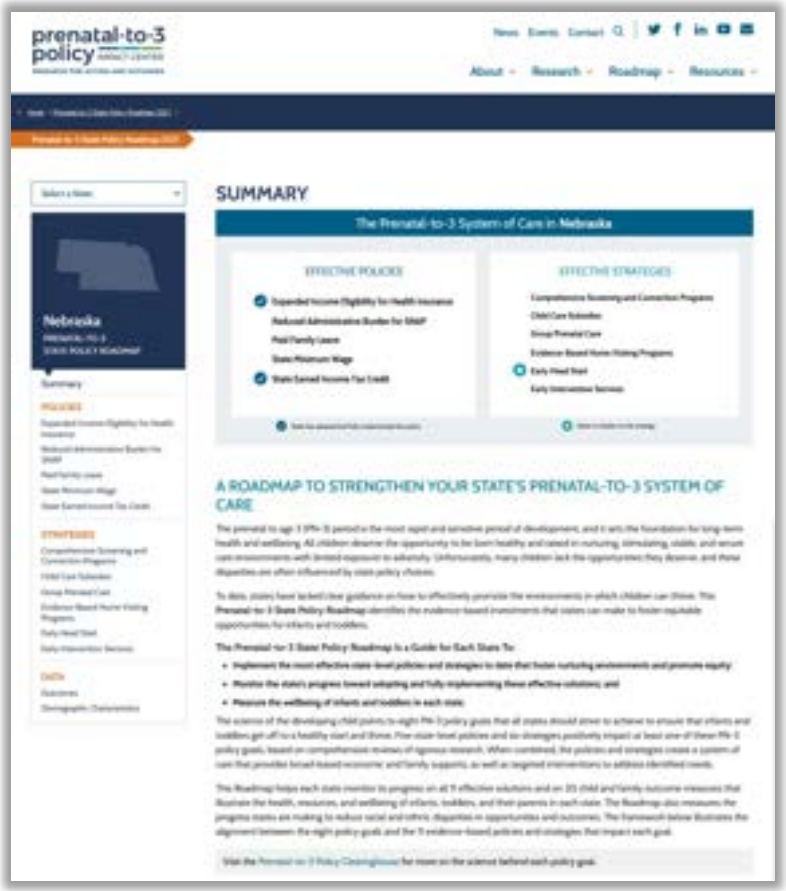
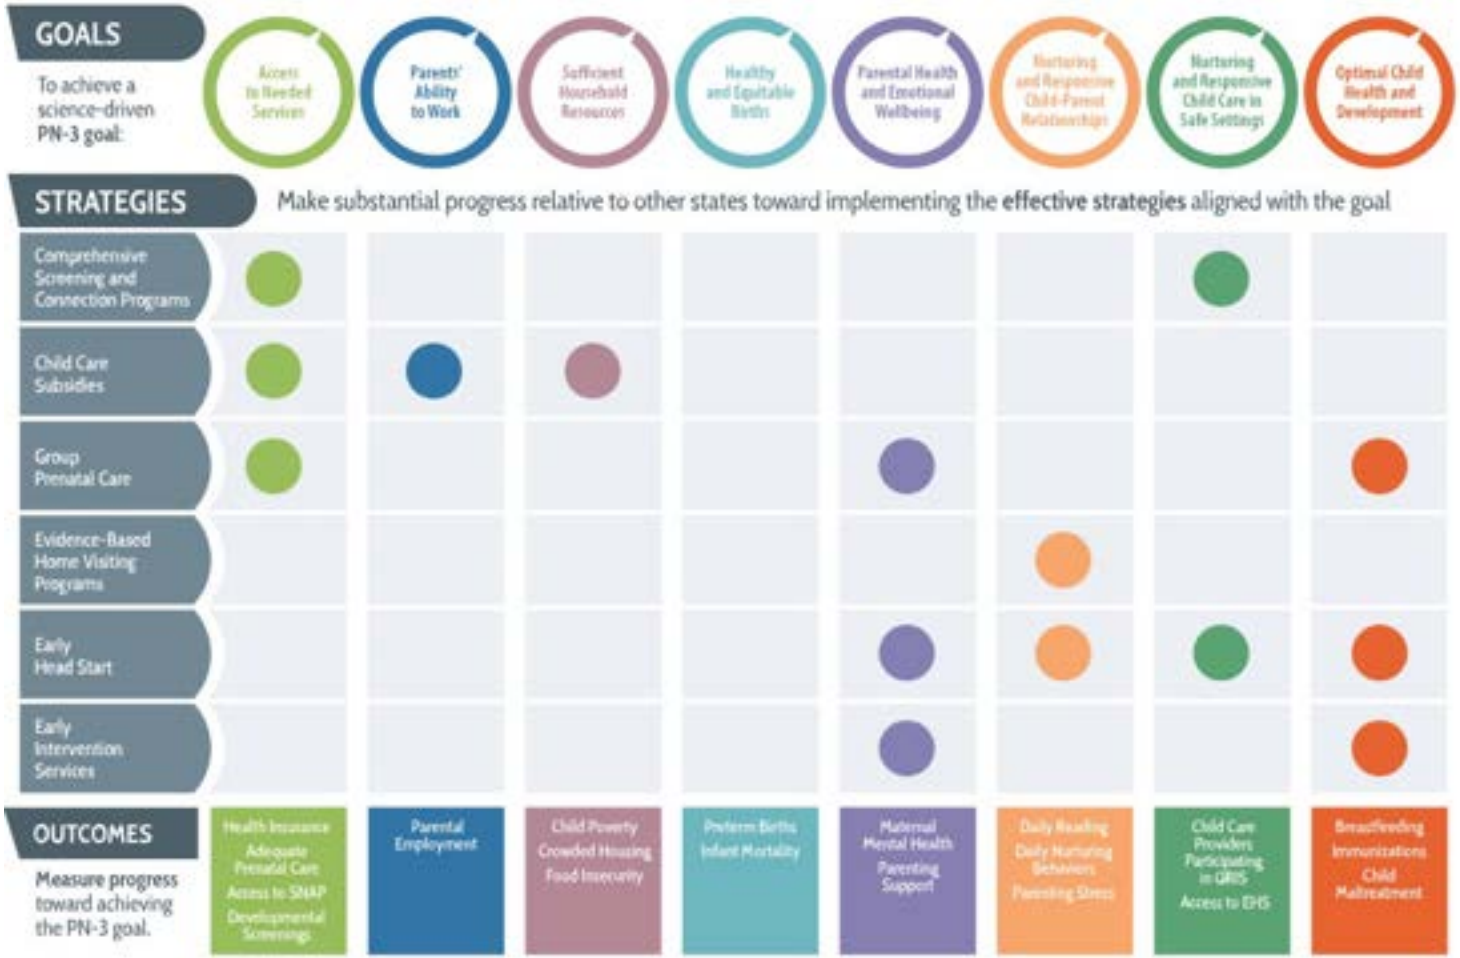
2021 Prenatal-to-3 State Policy Roadmap

pn3policy.org/roadmap

2021 Prenatal-to-3 State Policy Roadmap: State Summary for Nebraska



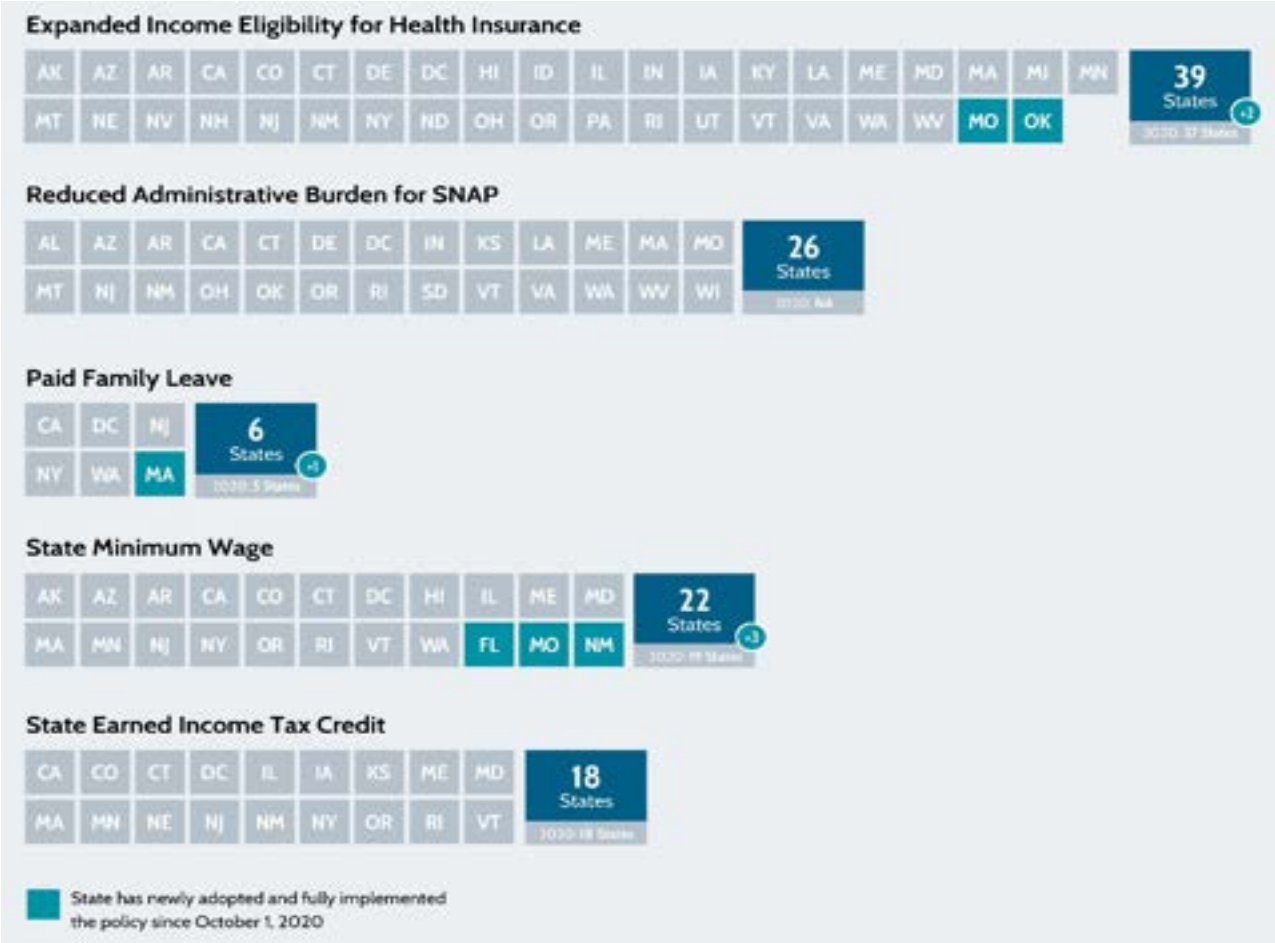
GOALS
To achieve a science-driven PN-3 goal:
Access to Needed Services
Parents' Ability to Work
Sufficient Household Resources
Healthy and Equitable Births
Parental Health and Emotional Wellbeing
Nurturing and Responsive Child-Parent Relationships
Nurturing and Responsive Child Care in Safe Settings
Optimal Child Health and Development
POLICIES
Adopt and fully implement the effective policies aligned with the goal
Expanded Income Eligibility for Health Insurance
Reduced Administrative Burden for SNAP
Paid Family Leave
State Minimum Wage
State Earned Income Tax Credit
OUTCOMES
Measure progress toward achieving the PN-3 goal.
Health Insurance
Adequate Prenatal Care
Access to SNAP
Developmental Screenings
Parental Employment
Child Poverty
Crowded Housing
Food Insecurity
Preterm Births
Infant Mortality
Maternal Mental Health
Parenting Support
Daily Reading
Daily Nurturing Behaviors
Parenting Stress
Child Care Providers Participating in QRIS
Access to EHS
Breastfeeding
Immunizations
Child Maltreatment



GOALS
To achieve a science-driven PN-3 goal:
Access to Needed Services
Parents' Ability to Work
Sufficient Household Resources
Healthy and Equitable Births
Parental Health and Emotional Wellbeing
Nurturing and Responsive Child-Parent Relationships
Nurturing and Responsive Child Care in Safe Settings
Optimal Child Health and Development
STRATEGIES
Make substantial progress relative to other states toward implementing the effective strategies aligned with the goal
Comprehensive Screening and Connection Programs
Child Care Subsidies
Group Prenatal Care
Evidence-Based Home Visiting Programs
Early Head Start
Early Intervention Services
OUTCOMES
Measure progress toward achieving the PN-3 goal.
Health Insurance
Adequate Prenatal Care
Access to SNAP
Developmental Screenings
Parental Employment
Child Poverty
Crowded Housing
Food Insecurity
Preterm Births
Infant Mortality
Maternal Mental Health
Parenting Support
Daily Reading
Daily Nurturing Behaviors
Parenting Stress
Child Care Providers Participating in QRIS
Access to EHS
Breastfeeding
Immunizations
Child Maltreatment

Nebraska Has Adopted and Fully Implemented 2 Policies

5 Additional States Fully Implemented a Roadmap Policy This Past Year
(MO implemented 2!)



Note: Due to additional evidence on how states can effectively reduce administrative burden for SNAP, 2021 is a new baseline year, and we do not show changes in the past year.

The Prenatal-to-3 System of Care in Nebraska

NEBRASKA

State Action

POLICIES

Effective policies impact PN-3 goals and research provides clear state legislative or regulatory action.

	Policy Definition		State Implementation
Expanded Income Eligibility for Health Insurance	State has adopted and fully implemented the Medicaid expansion under the ACA that includes coverage for most adults with incomes up to 138% of the federal poverty level.	✓	Nebraska expanded Medicaid eligibility under the Affordable Care Act in 2020. Legislators proposed no bills in the last year to modify eligibility requirements.
Reduced Administrative Burden for SNAP	State assigns 12-month recertification and simplified reporting to all eligible families with children, and offers online services, including at minimum, an online application.		Nebraska only assigns 6-month recertification intervals, but it does assign simplified reporting to all eligible families with children. Nebraska offers all three online services (initial application, change reporting, and renewal).
Paid Family Leave	State has adopted and fully implemented a paid family leave program of a minimum of 6 weeks following the birth, adoption, or the placement of a child into foster care.		Nebraska does not have a paid family leave program. Legislators proposed two bills—one to fund and one to enact—a paid family leave program with 12 weeks of benefits. Neither bill passed this session.
State Minimum Wage	State has adopted and fully implemented a minimum wage of $10 or greater.		The current state minimum wage in Nebraska is $9.00. In the last year, legislators proposed L.B. 480 to increase the state minimum wage gradually until it reaches $20.00 in 2032, but the bill failed.
State Earned Income Tax Credit	State has adopted and fully implemented a refundable EITC of at least 10% of the federal EITC for all eligible families with any children under age 3.	✓	Nebraska's refundable EITC is set to 10% of the federal credit. In the last year, legislators filed legislation to increase the generosity of the state's EITC to 20%, but it was indefinitely postponed.

✓ Adopted and fully implemented as of October 1, 2021

The Prenatal-to-3 System of Care in Nebraska

NEBRASKA

State Action

STRATEGIES

Effective strategies impact PN-3 goals, but the research does not yet provide precise guidance for state legislative or regulatory actions.

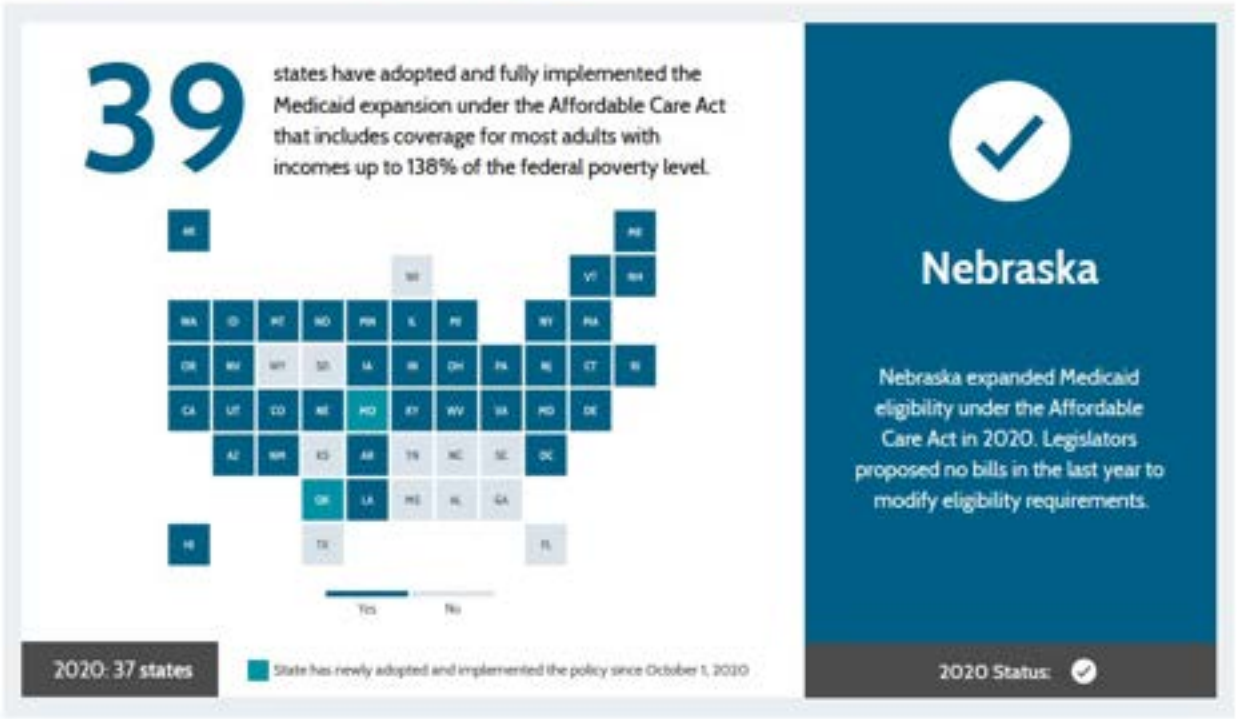
	Characteristics of Leading States		State Implementation
Comprehensive Screening and Connection Programs	Leading states have a high percentage of families who access the programs, enact legislation to reach families across the state, and invest deeply in evidence-based programs.		Families in Nebraska do not have access to any of the three evidence-based comprehensive screening and connection programs, but can access an alternative model, Help Me Grow.
Child Care Subsidies	Leading states provide high reimbursement rates that meet the providers' true cost of care, require low family copays, and have a low family share of the total cost of child care.		In Nebraska, low-income families with a child care subsidy may pay up to 16.7% of the total market rate price of care, and the state's base reimbursement rates cover 87.4% of the true cost of providing base-quality care.
Group Prenatal Care	Leading states provide financial support for group prenatal care, provide enhanced reimbursement rates for group prenatal care through Medicaid, and serve a substantial percentage of pregnant people.		In Nebraska, 3.3% of the state's pregnant people participated in group prenatal care through the CenteringPregnancy model in 2019. The state recognizes group prenatal care as an effective strategy to improve maternal and child health outcomes, but the state does not have a billing model through Medicaid that provides an enhanced reimbursement for group prenatal care services.
Evidence-Based Home Visiting Programs	Leading states serve a substantial percentage of low-income families with young children and use state dollars or Medicaid to support home visiting services.		Relative to other states, Nebraska serves a lower percentage of its low-income children under age 3 in the state's home visiting programs.
Early Head Start	Leading states have a state-specific program, provide state financial support for EHS, and serve a substantial percentage of low-income children.	★	Nebraska is a state leader in Early Head Start based on its state-specific program similar to EHS and the large share of eligible infants and toddlers served. Nebraska has a state-specific program, the Sixpence Early Learning Fund, that provides grants to home-based services, center-based services, and school-child care partnerships. Approximately 15.7% of eligible infants and toddlers in Nebraska have access to EHS, which is one of the highest percentages with access across states.
Early Intervention Services	Leading states serve a substantial percentage of children under age 3, increase eligibility for children, and maximize the use of Medicaid to pay for EI services.		Nebraska serves 4.6% of its 0-to-3 population in EI over the course of a year, ranking 45th among all states on this indicator. Nebraska is a birth mandate state, so EI services are guaranteed at no cost to all eligible children under age 3. The state is also one of just nine that report referring 100% of eligible children who have experienced maltreatment to Part C agencies, based on recent federal data.

★ Leading state on effective strategy

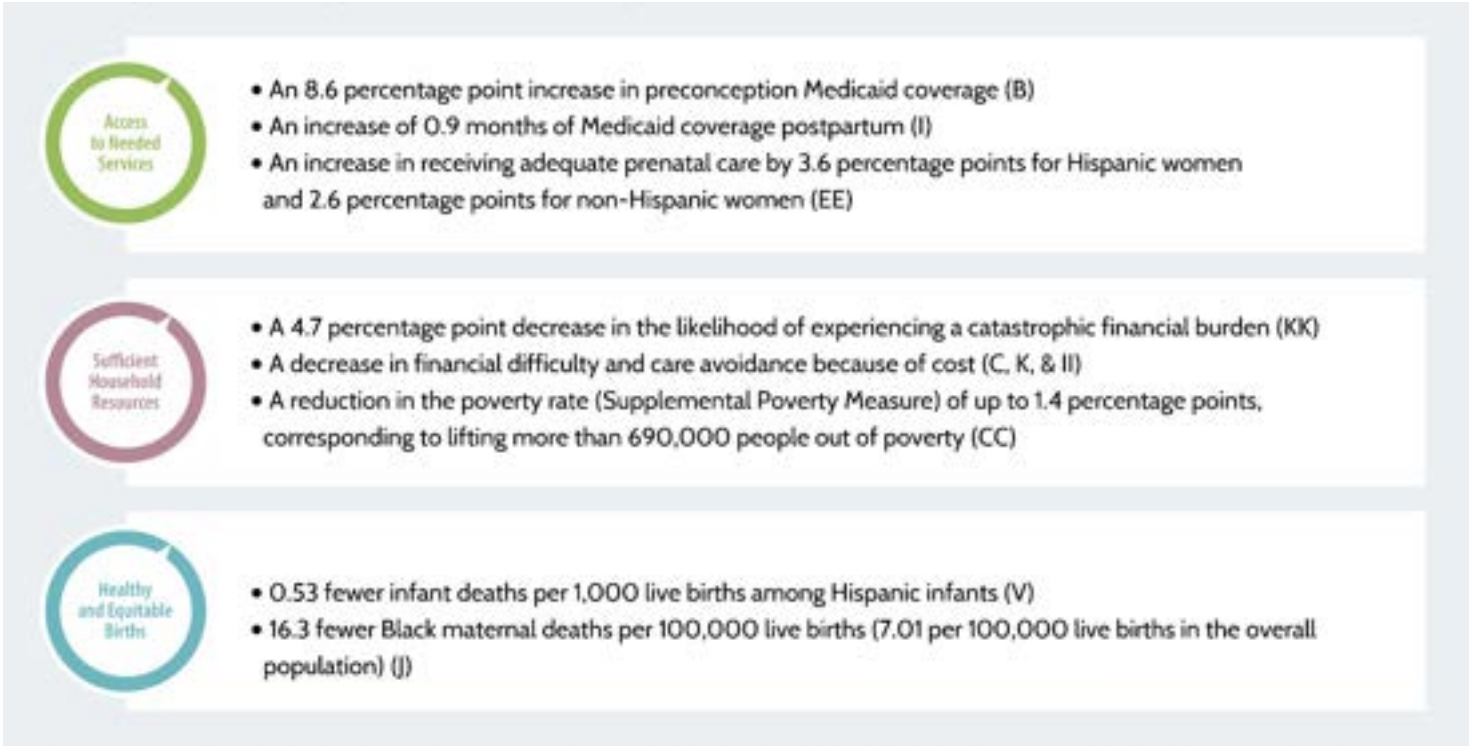
NEBRASKA

POLICY: Medicaid Expansion

Expanded income eligibility for health insurance is an effective state policy to impact:



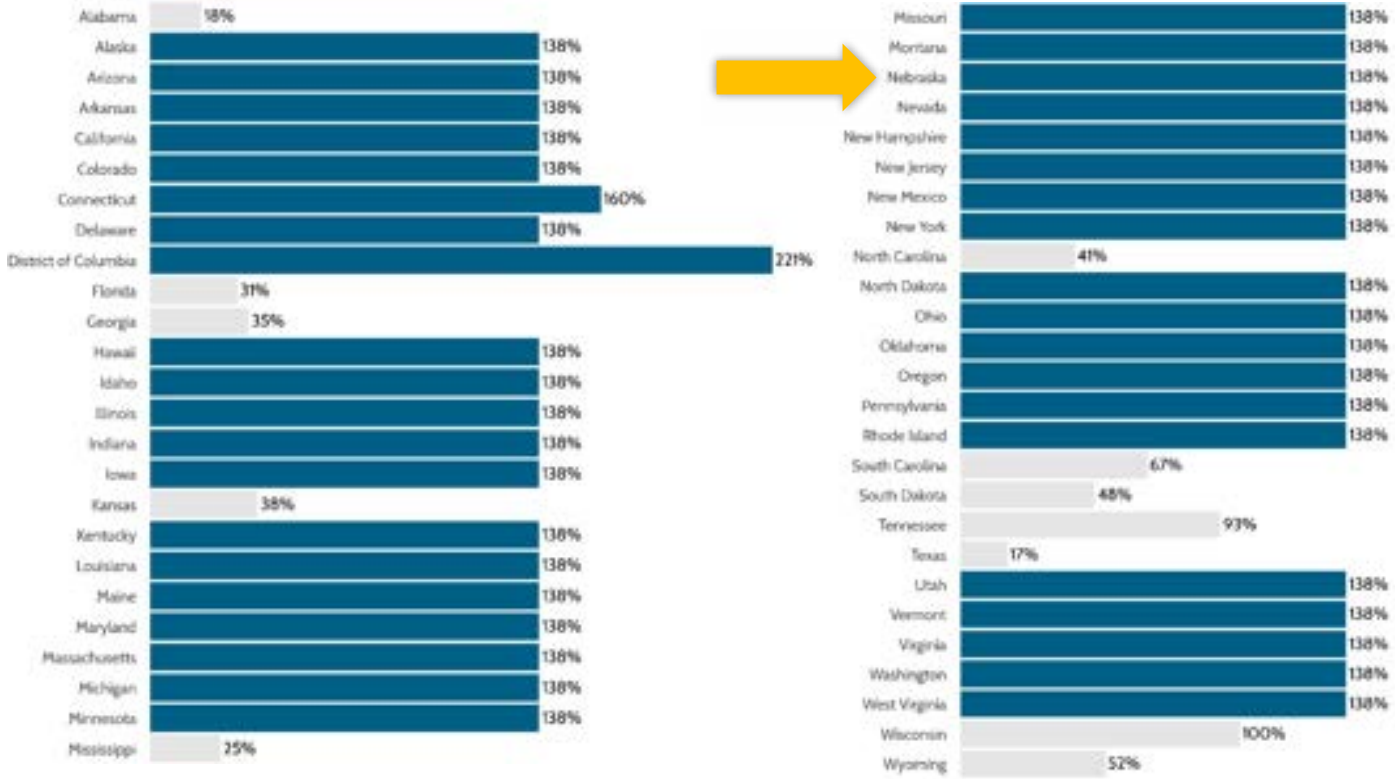
How Does Medicaid Expansion Impact PN-3 Outcomes?



NEBRASKA

POLICY: Medicaid Expansion

Variation Across States in Parents' Medicaid Income Eligibility Limits as a Percentage of the Federal Poverty Level

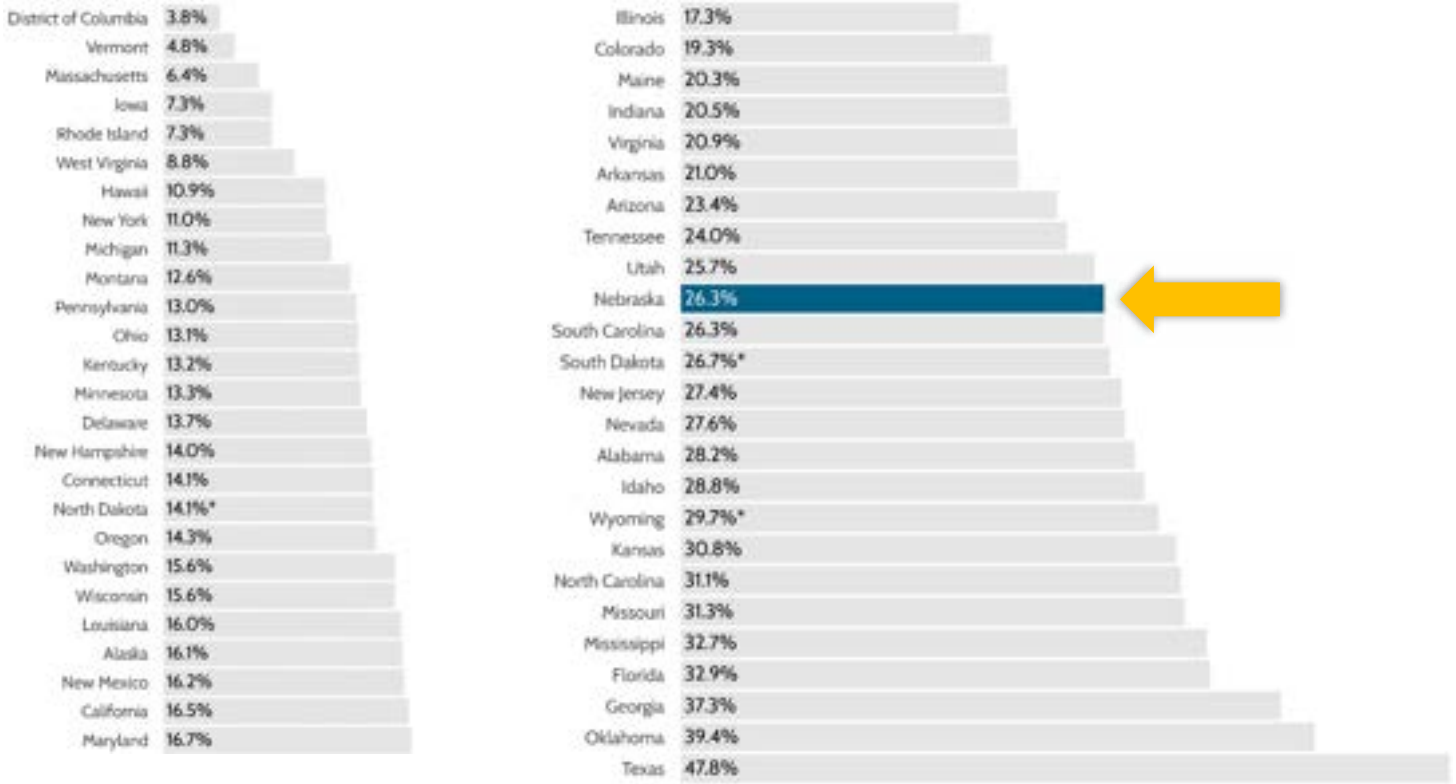


As of January 1, 2021. Kaiser Family Foundation and Medicaid state plan amendments (SPAs). Blue bar indicates that the state has expanded Medicaid.

NEBRASKA

POLICY: Medicaid Expansion

% Low-Income Women of Childbearing Age Without Health Insurance



Low income = <= 138% Federal Poverty Level

2019 American Community Survey (ACS) 1-Year Public Use Microdata Sample (PUMS).

NEBRASKA

POLICY:
Reduced Administrative Burden for SNAP

Reduced administrative burden for SNAP is an effective state policy to impact:

26 states assign 12-month recertification and simplified reporting to all eligible families with children, and offer online services, including at minimum, an online application.

Note: 2020 data are N/A. 2021 is the first year to track the number of states with a "Yes" for SNAP using updated methodology.

Nebraska

Nebraska only assigns 6-month recertification intervals, but it does assign simplified reporting to all eligible families with children. Nebraska offers all three online services (initial application, change reporting, and renewal).

As of July 1, 2021. Individual states' SNAP manuals, states' SNAP websites, and personal communications.

How Does Reduced Administrative Burden for SNAP Impact PN-3 Outcomes?

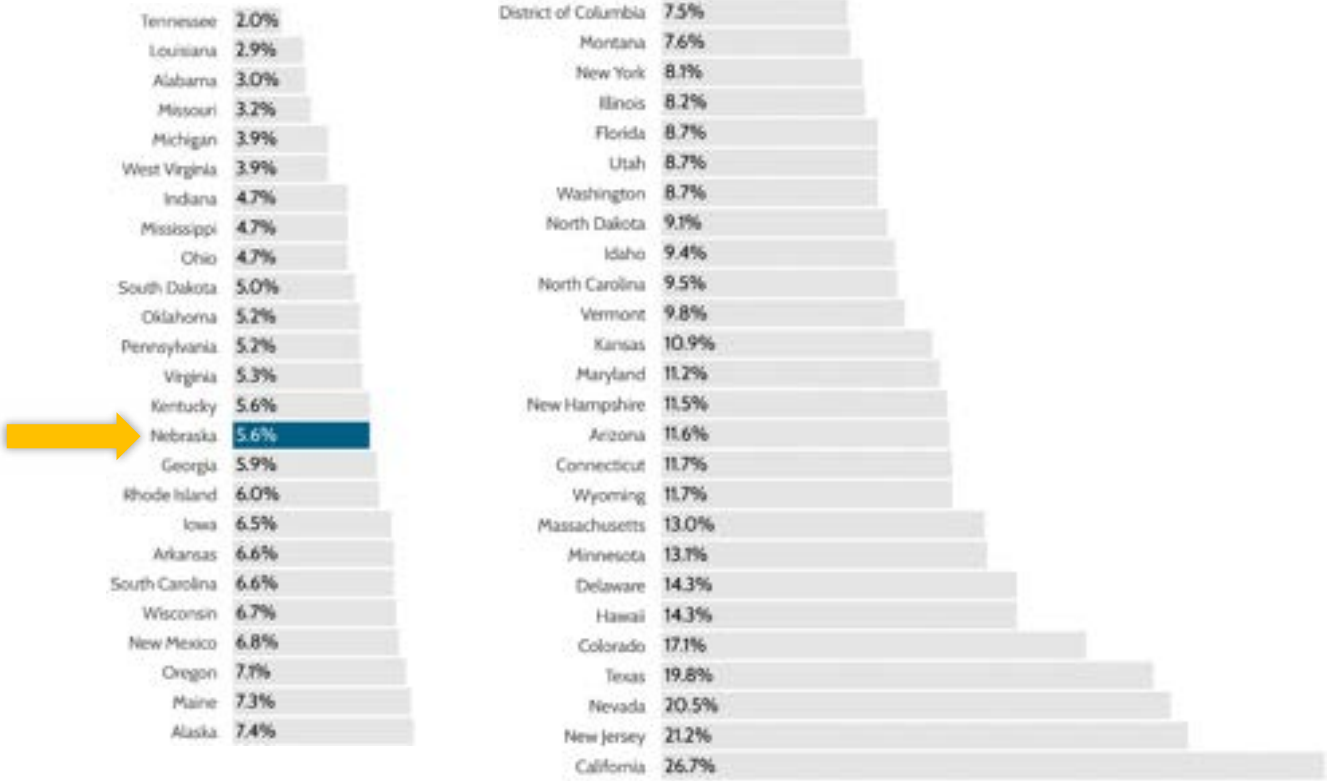
- Recertification intervals longer than 12 months led to an 11.4 percentage point increase in SNAP participation among households with children (E)
- The elimination of policies that added transaction costs and stigma to SNAP participation explained 14.2% of the SNAP caseload increase from 2000 to 2016 (A)
- Policies lengthening recertification intervals to longer than 3 months were associated with a 5.8% increase in SNAP participation from 2000 to 2009 (K)

- Participation in SNAP reduced household food insecurity by up to 36% in households with children (2)

NEBRASKA

POLICY:
Reduced Administrative Burden for SNAP

% Eligible Families With Children Under Age 18 Not Receiving SNAP



As of 2015-2017 (CPS-ASEC 2016-2018). Urban Institute's TRIM3 project.

NEBRASKA

POLICY: Paid Family Leave

A paid family leave program of a minimum of 6 weeks is an effective state policy to impact:

6 states have adopted and fully implemented a paid family leave program of a minimum of 6 weeks following the birth, adoption, or the placement of a child into foster care.

2020: 5 states

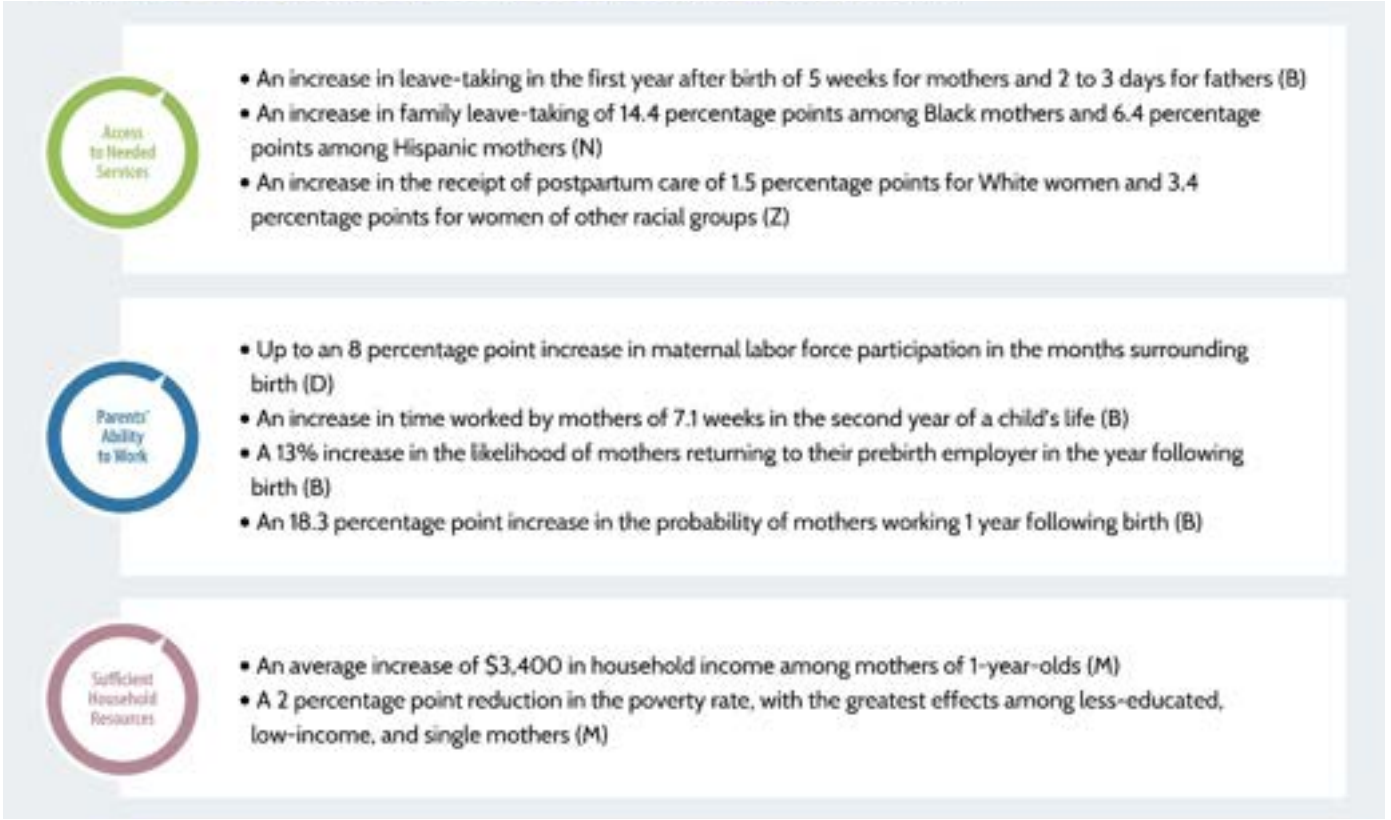
State has newly adopted and implemented the policy since October 1, 2020

Nebraska

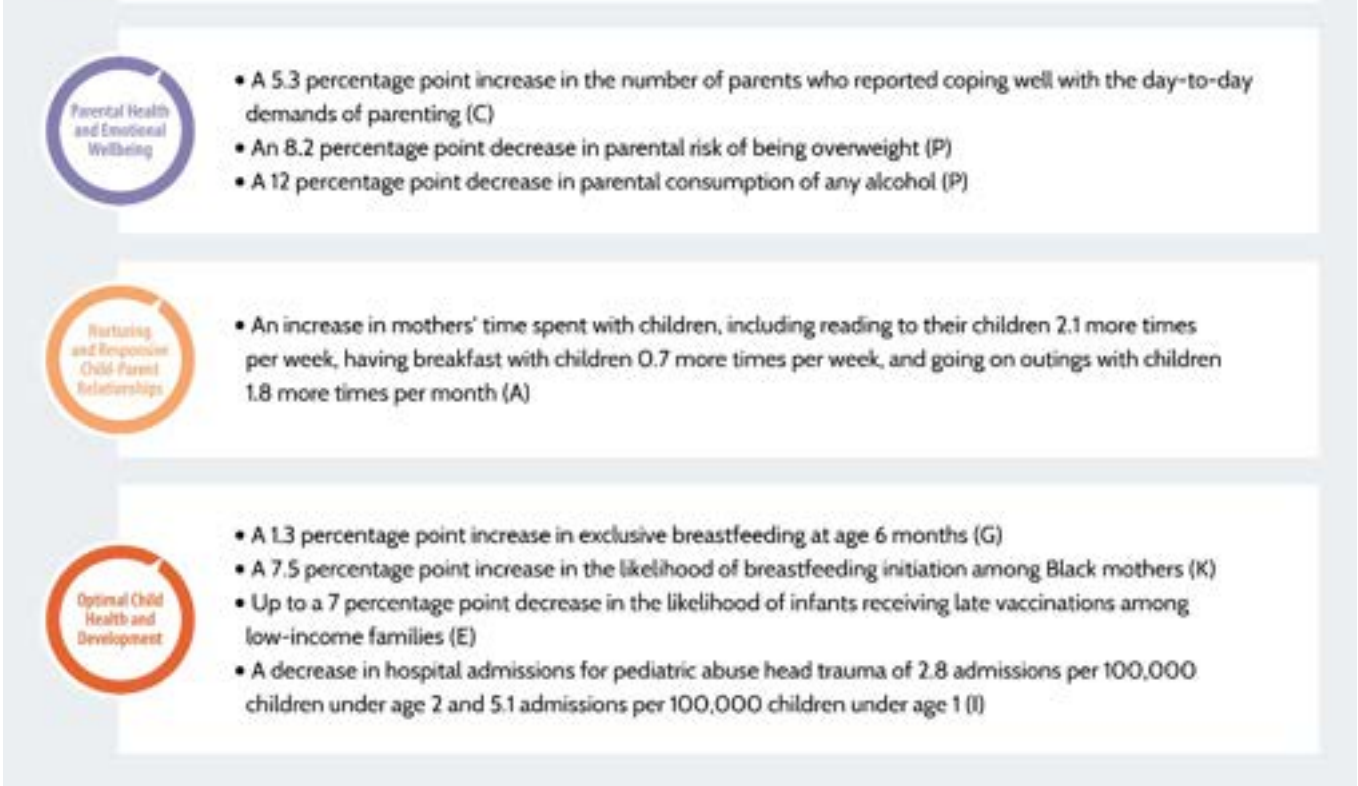
Nebraska does not have a paid family leave program. Legislators proposed two bills—one to fund and one to enact—a paid family leave program with 12 weeks of benefits. Neither bill passed this session.

2020 Status:

How Does Paid Family Leave Impact PN-3 Outcomes?



How Does Paid Family Leave Impact PN-3 Outcomes?



Variation Across States in Paid Family Leave Benefits and Administration

State	Implementation Timeline	Current Maximum Number of Weeks of Benefit	Current Maximum Dollar Value of Weekly Benefit	Current Benefit as Percentage of Wages	Funding and Administration Mechanisms
California	Enacted in 2002; benefits available in 2004	8	$1,357	Between 60% and 70% of the worker's average weekly wage, depending on their income. Very low-wage workers receive a fixed benefit amount set by statute, which may result in higher wage replacement rates.	Workers cover the full cost through a payroll deduction currently set at 1.2% of wages (does not apply to wages over $128,298/year). The program is administered through an existing state government department.
Colorado	Enacted in 2020; premiums effective in 2023; benefits available in 2024	12	$1,100	90% of the worker's average weekly wage for the portion of their wages equal to or less than 50% of the state average weekly wage; and then 50% of the portion of their wages above 50% of the state average weekly wage.	Workers and employers share the cost. Up to 50% of the premium can be withheld from workers' wages; employers (with more than 10 employees) contribute at least 50% of the premium. Initially, the total premium will be 0.9% of wages. Premiums do not apply to wages above the Social Security contribution base. The program is administered through a new state government division.
Connecticut	Enacted in 2019; premiums effective in 2021; benefits available in 2022	12	$780	95% of the worker's average weekly wage for the portion of their wages equal to or less than 40 times the state minimum wage; and then 60% of the portion of their wages above 40 times the state minimum wage.	Workers cover the full cost, currently set at 0.5% of wages. Contributions do not apply to wages above the Social Security contribution base. The program is administered through a new quasi-public agency.
District of Columbia	Enacted in 2017; benefits available in 2020	8	$1,000	90% of the worker's average weekly wage for the portion of their wages equal to or less than 60 times the DC minimum wage; and then 50% of the portion of their wages above 60 times the DC minimum wage.	Employers cover the full cost and contribute 0.62% of the wages of covered workers. The program is administered through a new state government office.
Massachusetts	Enacted in 2018; premiums effective in 2019; benefits available in 2021	12	$850	80% of the worker's average weekly wage for the portion of their wages equal to or less than 50% of the statewide average weekly wage; and then 50% of the portion of their wages above 50% of the statewide average weekly wage.	Workers cover the full cost, currently set at 0.75% of wages. Premiums do not apply to wages above the Social Security contribution base. The program is administered through a new state government department.

As of July 28, 2021. State paid family leave laws and A Better Balance.

Variation Across States in Paid Family Leave Benefits and Administration

State	Implementation Timeline	Current Maximum Number of Weeks of Benefit	Current Maximum Dollar Value of Weekly Benefit	Current Benefit as Percentage of Wages	Funding and Administration Mechanisms
New Jersey	Enacted in 2008; premiums effective & benefits available in 2009	12	$903	85% of the worker's average weekly wage.	Workers cover the full cost through a payroll deduction, currently set at 0.28% of wages. This deduction does not apply to wages above $138,200/year. The program is administered through an existing state government department.
New York	Enacted in 2016; benefits available in 2018 (maximum benefit of 12 weeks available in 2021)	12	$972	67% of the worker's average weekly wage.	Workers cover the full cost through a payroll deduction, currently set at 0.511% of wages. This deduction does not apply to wages above $1,450.17/ week. The program is administered through an existing state government department.
Oregon	Enacted in 2019; premiums effective & benefits available in 2023	12	$1,497	100% of the worker's average weekly wage for the portion of their wages equal to or less than 65% of the statewide average weekly wage; and then 50% of the portion of their wages above 65% of the statewide average weekly wage.	Workers and employers share the cost. Up to 60% of the premium can be withheld from workers' wages; employers (with more than 25 employees) contribute at least 40% of the premium. The total premium will not exceed 1% of wages. Premiums do not apply to wages above $132,900/year. The program is administered through an existing state government department.
Rhode Island	Enacted in 2013; benefits available in 2014 (benefits increase to 6 weeks in 2022, with maximum benefit of 8 weeks available in 2023)	4	$978	60% of the worker's average weekly wage.	Workers cover the full cost through a payroll deduction, currently set at 1.3% of wages. This deduction does not apply to wages above $74,000/year. The program is administered through an existing state government department.
Washington	Enacted in 2017; premiums effective in 2019; benefits available in 2020	12	$1,206	90% of the worker's average weekly wage for the portion of their wages equal to or less than 50% of the statewide average weekly wage; and then 50% of the portion of their wages above 50% of the statewide average weekly wage.	Workers cover the full cost, currently set at 0.13% of wages. Premiums do not apply to wages above the Social Security contribution base. The program is administered through an existing state government department.

As of July 28, 2021. State paid family leave laws and A Better Balance.

NEBRASKA

POLICY: State Minimum Wage

A state minimum wage of $10.00 or greater is an effective state policy to impact:

22 states have adopted and fully implemented a minimum wage of $10.00 or greater.

2020: 19 states

State has newly adopted and implemented the policy since October 1, 2020

Nebraska

The current state minimum wage in Nebraska is $9.00. In the last year, legislators proposed L.B. 480 to increase the state minimum wage gradually until it reaches $20.00 in 2032, but the bill failed.

2020 Status:

How Does a Higher State Minimum Wage Impact PN-3 Outcomes?

- For mothers with no college degree with children under age 6, a 10% increase in the minimum wage reduced poverty by 9.7% (J)
- A 10% increase in the minimum wage led to a 3.5% increase in earnings for low-income families and produced a 4.9% reduction in poverty for children under age 18 (B)

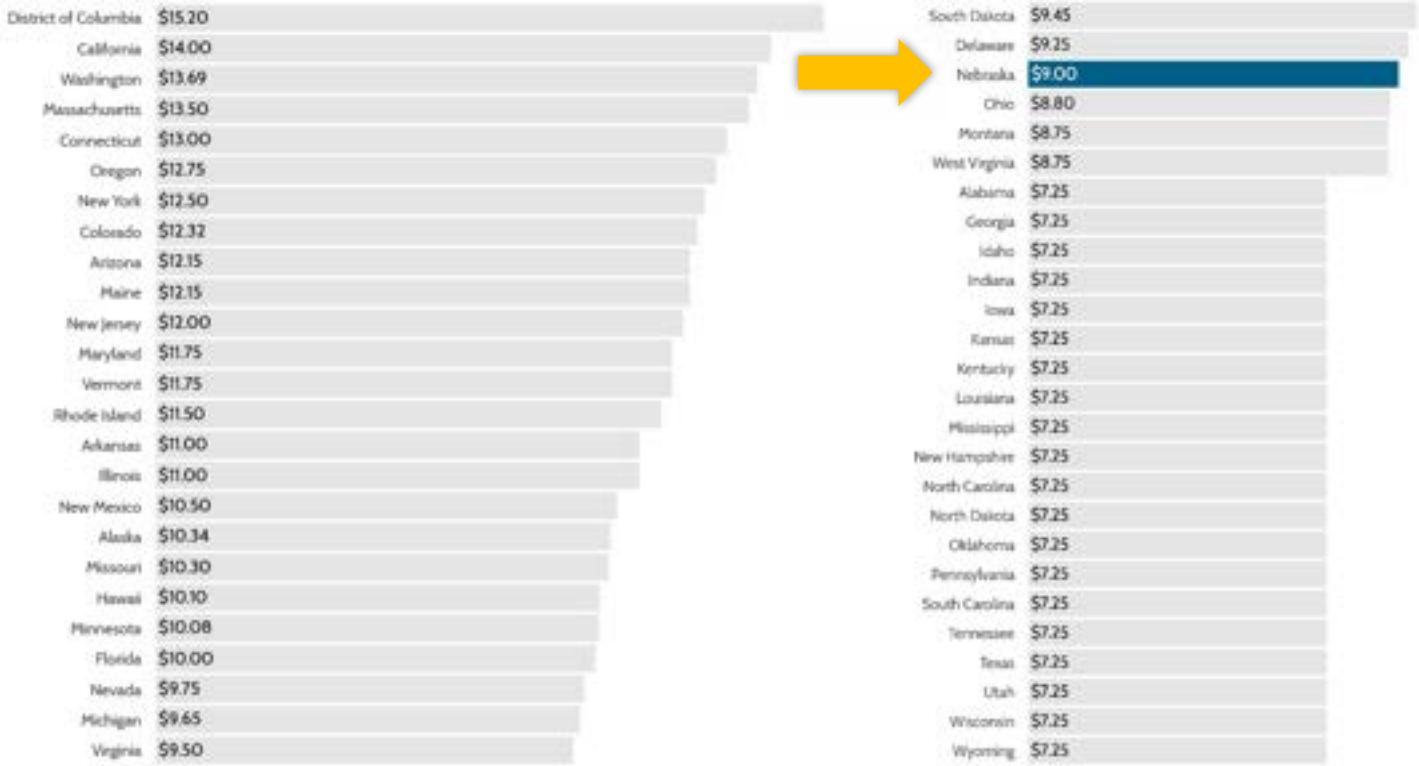
- A $1.00 minimum wage increase above the federal level led to approximately a 2% decrease in low birthweight and a 4% decrease in postneonatal mortality (E)
- For pregnant women, setting the tipped minimum wage at the full federal minimum wage level led to overall healthier birthweights for gestational age (O)

- A $1.00 increase in the minimum wage reduced child neglect reports by 9.6% overall and by 10.8% for children ages 0 to 5 (G)
- Children affected by a $1.00 increase in the minimum wage from birth through age 5 saw an 8.7% higher likelihood of excellent or very good health and missed 15.6% fewer school days due to illness or injury from ages 6 through 12 (I)

NEBRASKA

POLICY: State Minimum Wage

Current State Minimum Wages



As of October 1, 2021. State labor statutes.

NEBRASKA

POLICY: State Earned Income Tax Credit

A refundable state EITC of at least 10% of the federal EITC is an effective state policy to impact:

18 states have adopted and fully implemented a refundable EITC of at least 10% of the federal EITC for all eligible families with any children under age 3.

2020: 18 states

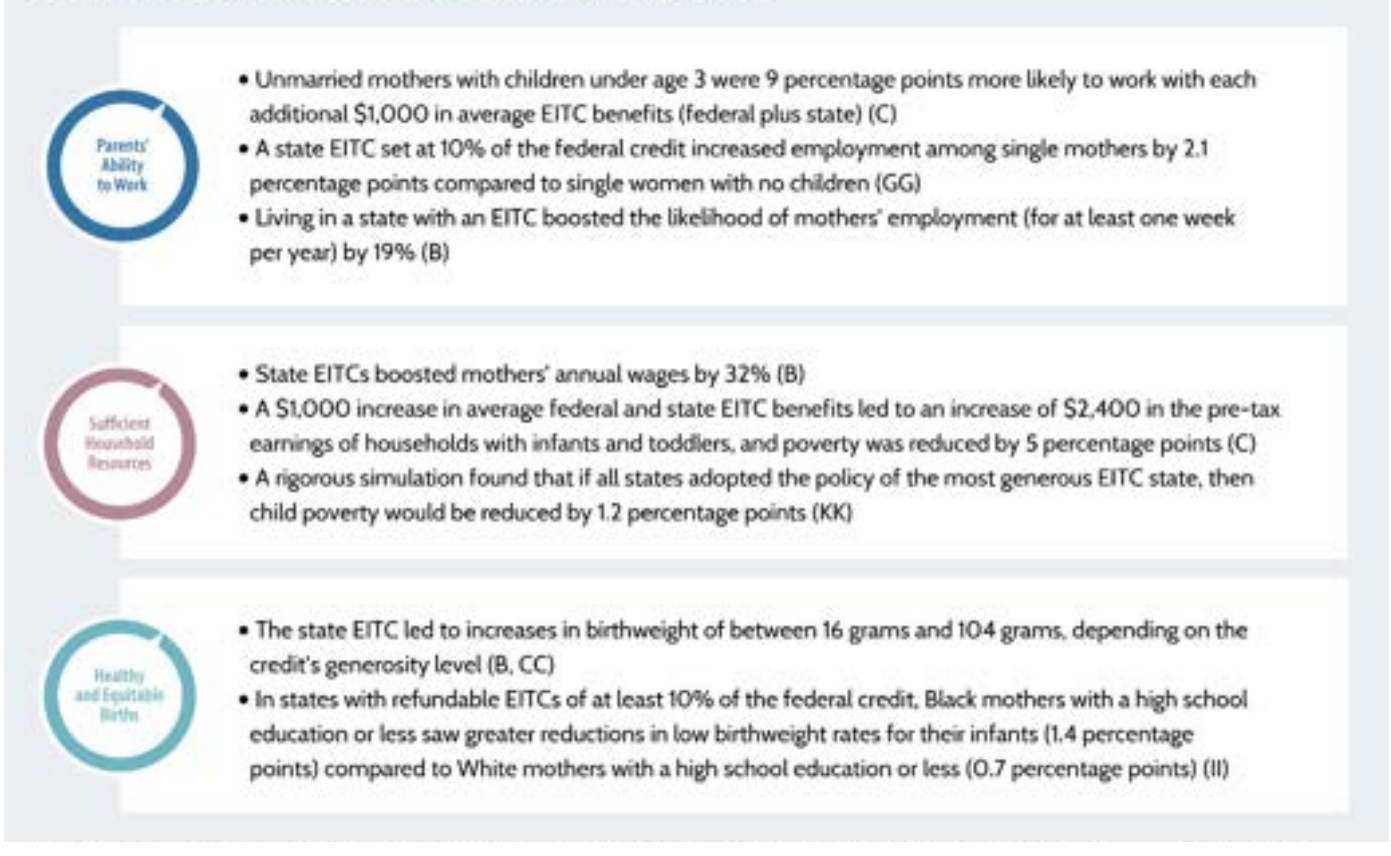
Nebraska

Nebraska's refundable EITC is set to 10% of the federal credit. In the last year, legislators filed legislation to increase the generosity of the state's EITC to 20%, but it was indefinitely postponed.

2020 Status:

As of Tax Year 2021. State income tax statutes.

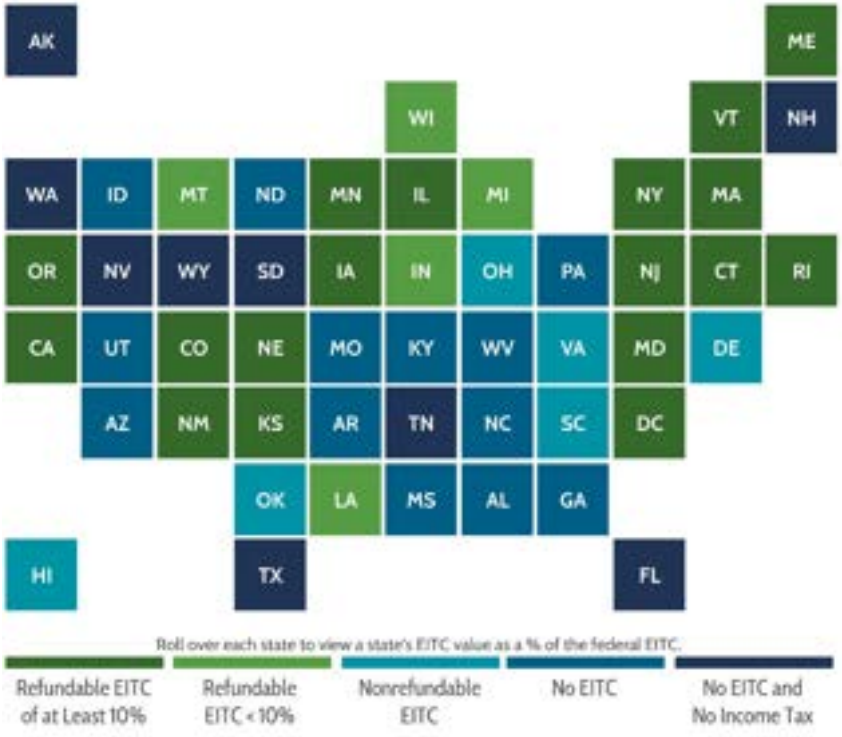
How Does a State EITC Impact PN-3 Outcomes?



UNITED STATES

POLICY: State Earned Income Tax Credit

Federal EITC by EITC Status



As of Tax Year 2021. State income tax statutes, the Center on Budget and Policy Priorities, and the Urban Institute.

NEBRASKA

STRATEGY:
Comprehensive Screenings and Connection Programs

Comprehensive screening and connection programs are an effective strategy to impact:

COMPREHENSIVE SCREENING AND CONNECTION PROGRAMS

use screening tools to identify the needs of children and families and connect them to targeted programs and services.

State leaders in this strategy have a high percentage of families who access the programs, enact legislation to reach families across the state, and invest deeply in evidence-based programs.

State leaders: CT MA NJ NC OR

Families in Nebraska do not have access to any of the three evidence-based comprehensive screening and connection programs, but can access an alternative model, Help Me Grow.

How Do Comprehensive Screenings and Connection Programs Impact PN-3 Outcomes?

- DULCE families received an average of 0.5 more community resources at the 6 and 12 month follow up (J)
- Family Connects families accessed between 0.7 (D) and 0.9 (B) more community resources
- HealthySteps families had 3.5 times higher odds of being informed about community resources (F)

- Among those parents in Family Connects using nonparental care, out-of-home care quality was rated higher (0.66 points on a 5 point scale) compared to control families (B)

Number of Sites and Percent of Children/Families Served through the Family Connects Program

State	Number of Program Sites	% of Children/Families Served
Arkansas	1	0.2%
California	1	0.2%
Illinois	3	0.6%
Iowa	2	2.8%
Maryland	1	0.5%
Minnesota	1	0.2%
New York	1	0.1%
North Carolina	5	5.9%
Oklahoma	1	2.0%
Oregon	1	0.2%
Texas	5	0.3%
Wisconsin	1	0.8%

As of 2019. Family Connects International, Duke University's Center for Child and Family Policy.

NEBRASKA

STRATEGY: Group Prenatal Care

Group prenatal care is an effective state strategy to impact:

GROUP PRENATAL CARE

provides education, support, and obstetric care to pregnant people with similar gestational age in a group format.

State leaders in this strategy provide financial support for group prenatal care, provide enhanced reimbursement rates for group prenatal care through Medicaid, and serve a substantial percentage of pregnant people.

State leaders: MD MT NJ OH SC

In Nebraska, 3.3% of the state's pregnant people participated in group prenatal care through the CenteringPregnancy model in 2019. The state recognizes group prenatal care as an effective strategy to improve maternal and child health outcomes, but the state does not have a billing model through Medicaid that provides an enhanced reimbursement for group prenatal care services.

How Does Group Prenatal Care Impact PN-3 Outcomes?

- A 6.4 percentage point decrease in the likelihood of receiving inadequate prenatal care (C)
- Approximately 2 more prenatal visits among participating Black women with high-risk pregnancies (H)

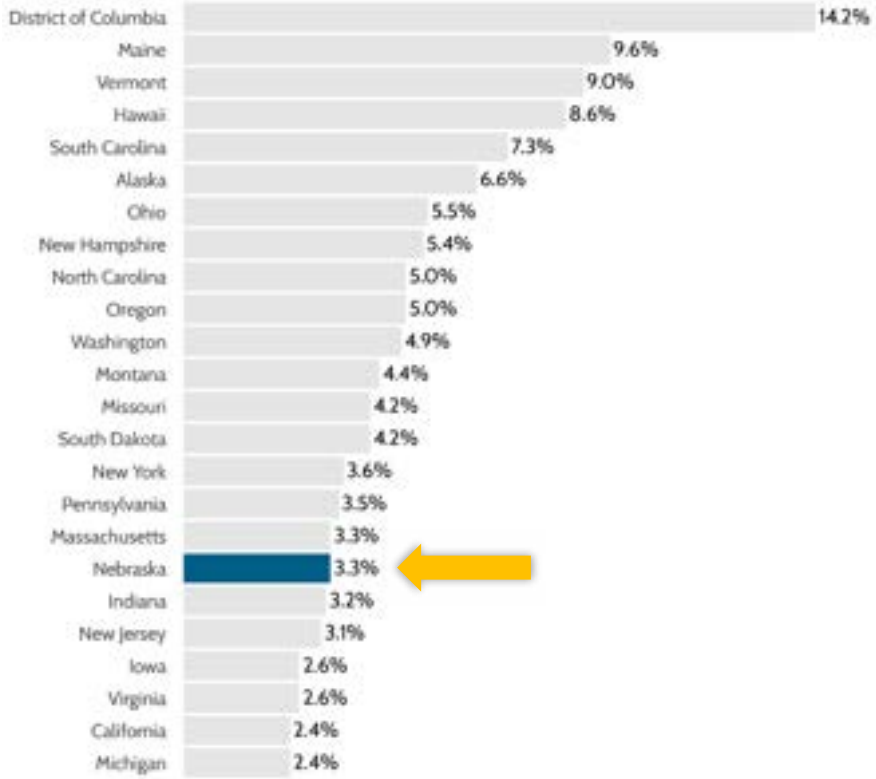
- Cases of probable depression decreased by 31% for women in group prenatal care compared to 15% for women in individual prenatal care from the second trimester to 1 year postpartum (A)
- High-stress women in group prenatal care were more likely to experience a decrease in depressive symptoms postpartum (D)

- The rate of breastfeeding initiation increased by approximately 12 percentage points (C)

NEBRASKA

STRATEGY: Group Prenatal Care

Estimated % of Births to People Participating in CenteringPregnancy



As of 2019. Centering Healthcare Institute Inc.

NEBRASKA

STRATEGY: Evidence-Based Home Visiting Programs

Evidence-based home visiting programs are an effective state strategy to impact:

EVIDENCE-BASED HOME VISITING PROGRAMS

provide support and education to parents in the home through a trained professional or paraprofessional.

State leaders in this strategy serve a substantial percentage of low-income families with young children and use state dollars or Medicaid to support home visiting services.

State leaders: IL IA KS ME NY

Nebraska, relative to other states, serves a lower percentage of its low-income children under age 3 in the state's home visiting programs.

How Do Evidence-Based Home Visiting Programs Impact Parenting Outcomes?

- Home visiting led to small but significant effects for improving parenting behaviors (overall effect sizes on parenting outcomes from meta-analyses range from 0.09 to 0.37) (A, C, D, E)
- Significant effects emerge within the context of many more null findings (B, E)

NEBRASKA

STRATEGY: Evidence-Based Home Visiting Programs

Estimated % of Eligible Children Under Age 3 Served in Evidence-Based Home Visiting Programs

2020 National Home Visiting Resource Center Yearbook. 2018 & 2019 American Community Survey (ACS) 1-Year Public Use Microdata Sample (PUMS).

NEBRASKA

STRATEGY: Early Head Start

Early Head Start is an effective state strategy to impact:

EARLY HEAD START

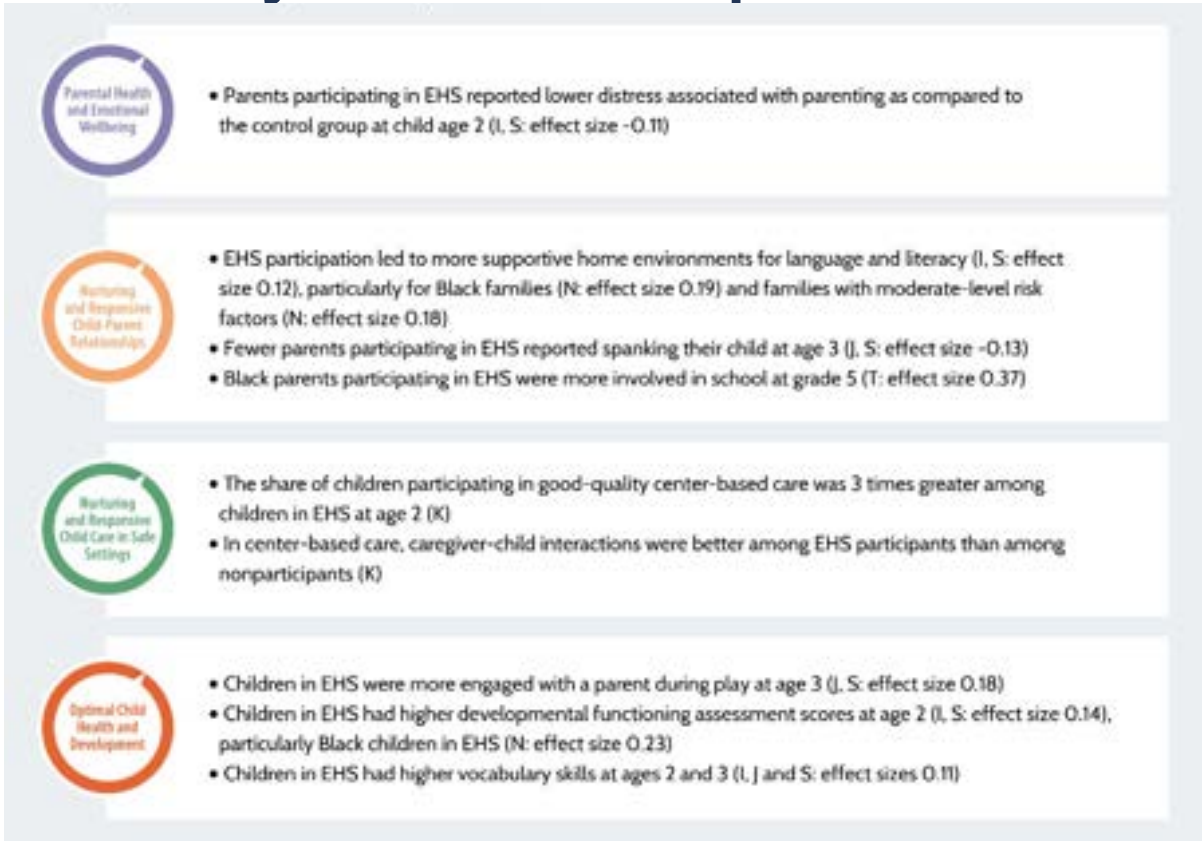
serves low-income pregnant women, infants, toddlers, and their families through comprehensive child development and family services delivered in a variety of formats.

State leaders in this strategy have a state-specific program, provide state financial support for EHS, and serve a substantial percentage of low-income children.

State leaders: AK DC IL ME NE OR WA

Nebraska is a state leader in Early Head Start based on its state-specific program similar to EHS and the large share of eligible infants and toddlers served. Nebraska has a state-specific program, the Sixpence Early Learning Fund, that provides grants to home-based services, center-based services, and school-child care partnerships. Approximately 15.7% of eligible infants and toddlers in Nebraska have access to EHS, which is one of the highest percentages with access across states.

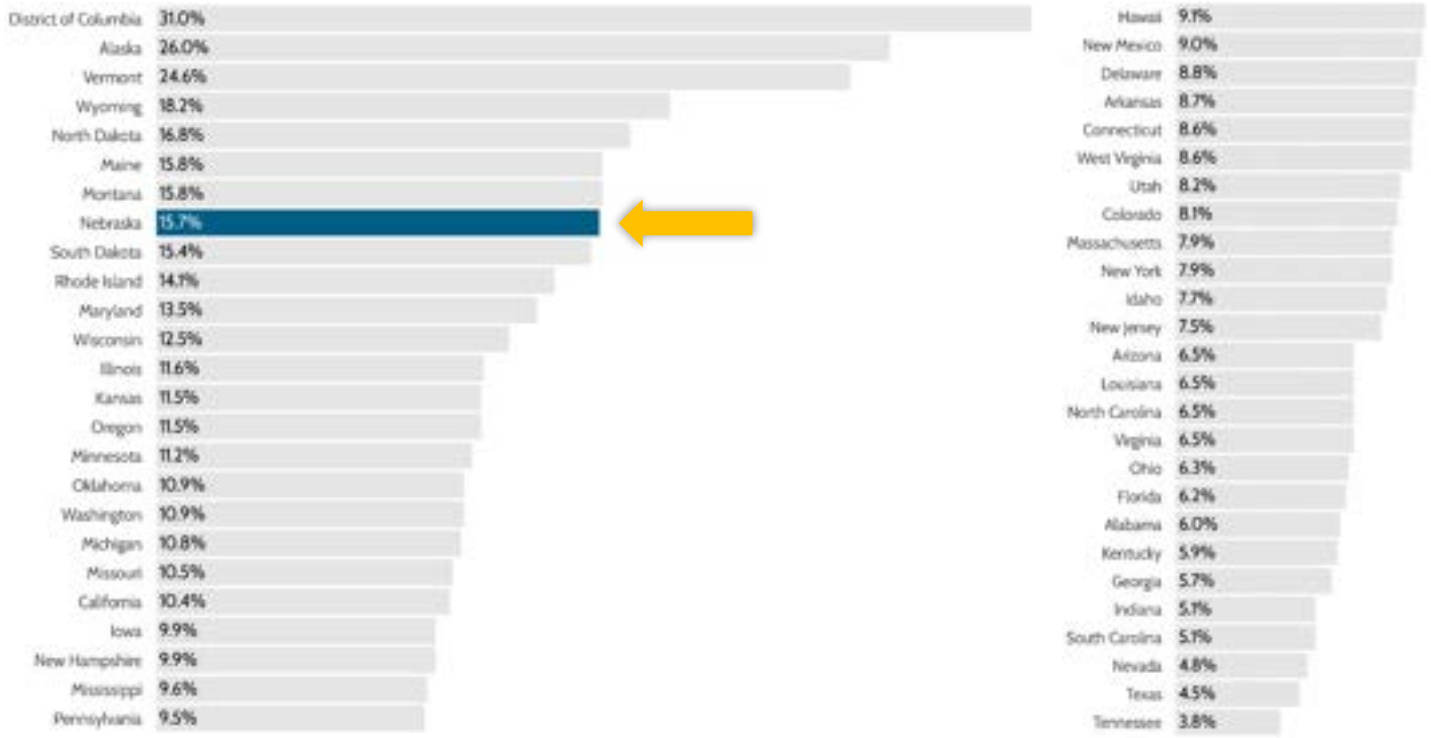
How Does Early Head Start Impact PN-3 Outcomes?



NEBRASKA

STRATEGY: Early Head Start

Estimated % of Income-Eligible Children With Access to Early Head Start



2019 Early Head Start (EHS) Program Information Report (PIR) and 2018 & 2019 American Community Survey (ACS) Public-Use Microdata Sample (PUMS).

NEBRASKA

STRATEGY: Early Intervention Services

Early Intervention services are an effective state strategy to impact:

EARLY INTERVENTION SERVICES:

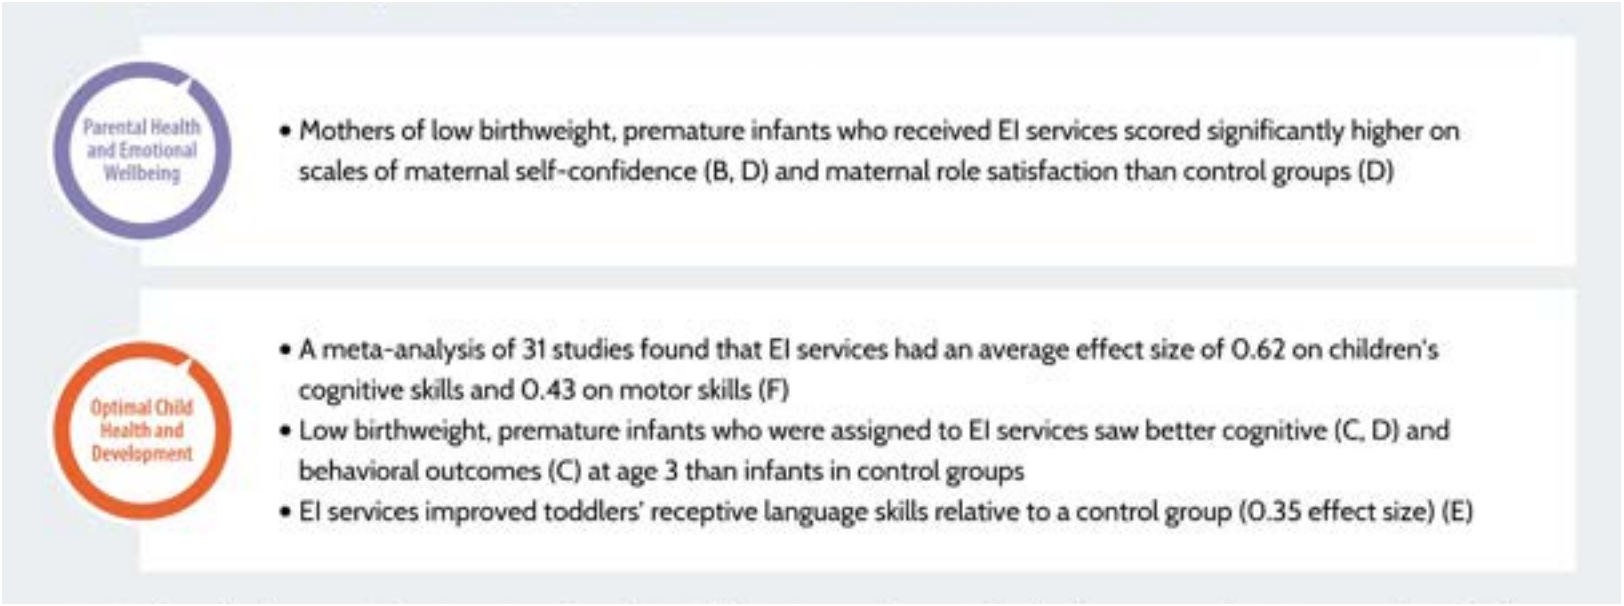
are child- and family-centered services and therapies to support the healthy development of infants and toddlers with disabilities, developmental delays, or who are at risk for delays.

State leaders in this strategy serve a substantial percentage of children under age 3, increase eligibility for children, and maximize the use of Medicaid to pay for EI services.

State leaders: CO CT IL MA MN NM RI

Nebraska serves 4.6% of its 0-to-3 population in EI over the course of a year, ranking 45th among all states on this indicator. Nebraska is a birth mandate state, so EI services are guaranteed at no cost to all eligible children under age 3. The state is also one of just nine that report referring 100% of eligible children who have experienced maltreatment to Part C agencies, based on recent federal data.

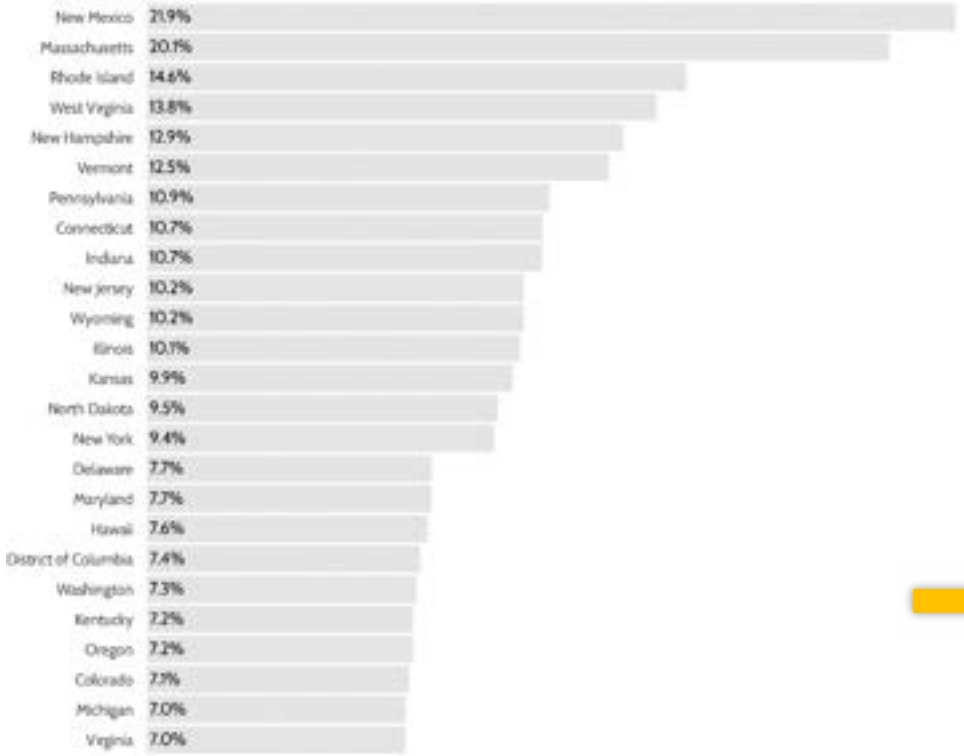
How Do Early Intervention Services Impact PN-3 Outcomes?

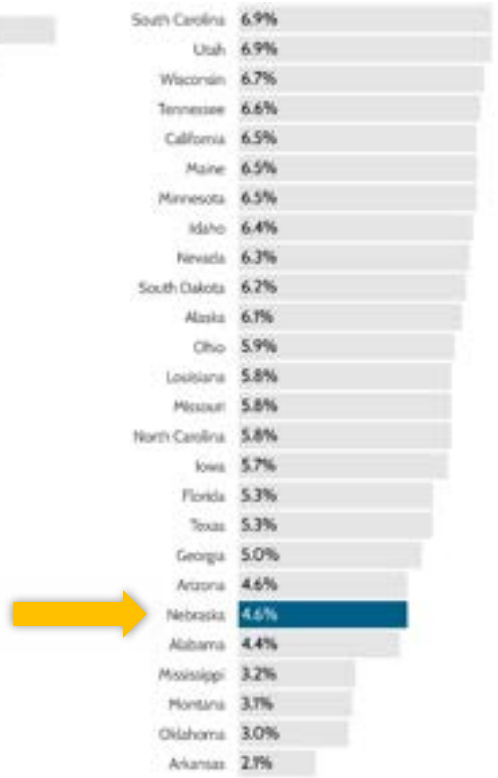


NEBRASKA

STRATEGY: Early Intervention Services

Cumulative % Children Under Age 3 Receiving EI Services





As of 2019-2020. US Department of Education, EDFacts Metadata and Process System (EMAPS) and US Census Population Estimates.

NEBRASKA

STRATEGY: Child Care Subsidies

Child care subsidies are an effective state strategy to impact:

CHILD CARE SUBSIDIES

provide financial assistance to help make child care more affordable for low-income families with parents who are working or enrolled in education or training programs.

State leaders in this strategy provide high reimbursement rates that meet the providers' true cost of care, require low family copays, and have a low family share of the total cost of child care.

State leaders: CA DC LA NM NY SD WA

In Nebraska, low-income families with a child care subsidy may pay up to 16.7% of the total market rate price of care, and the state's base reimbursement rates cover 87.4% of the true cost of providing base-quality care.

How Do Child Care Subsidies Impact PN-3 Outcomes?

- Higher state subsidy spending per low-income child (of $1,000) led to 86% higher odds of enrollment in a single center-based care arrangement, rather than multiple care arrangements (B)

- A 10% increase in Child Care Development Fund subsidy expenditures led to a 0.7% increase in mothers' employment rate (A)
- $1,000 higher annual state subsidy spending per low-income child led to a 3.5 percentage point increase in the likelihood of maternal employment (D)

- Subsidy receipt led to an increase in monthly earnings by 250% (E)

How do the effective policies interact to determine the level of household resources families have available to provide for their children?

- Assumptions for the simulation
  - Single mother family, with an infant and toddler
  - She works full time, full year at the state's minimum wage
  - She leaves her children in center-based child care, that charges the 75th percentile of the market rate

Total Resources Based on State Policy Choices

Minimum Wage Earnings

Summary

- The prenatal-to-3 period of development sets the stage for lifelong health and wellbeing
- Many children lack the opportunities and rights they deserve for a healthy start, and these children are disproportionately children of color
- State policy choices can reduce family stressors and increase capacities, which have substantial impacts on health and wellbeing over the life course
