

Grant Title: BASIC AND TRANSLATIONAL RESEARCH IN EMOTION (R01)

Grant Number: PA-06-380

Area of Research: Research involved in the experience, expression and regulation of emotion.

Release and Expiration: May 1, 2006 release; March 2, 2009 expiration.

Application Deadline: *ROI-New:* February 5, June 5, October 5 annually.

Amount: *ROI:* Typically under \$500,000 per year in direct costs; if request equals or exceeds \$500,000, prior approval is required.

Length of Support: *ROI:* Up to 5 years.

Eligible Applicants: For-profit organizations, non-profit organizations, public or private institutions, such as universities, colleges, hospitals, and laboratories, units of State government, units of local government, eligible agencies of the Federal government, non-domestic institutions, domestic Institutions, faith-based or community-based organizations, Indian/Native American Tribal government (Federally recognized); Indian/Native American Tribal government (other than Federally recognized); and Indian/Native American Tribally Designated Organization.

Agency/ Department: NIH; NIMH, NIA, NIAAA, NCI, NICHD, NIDA, NINDS

Summary: This funding opportunity supports research that expands basic and translational research on the processes and mechanisms involved in the experience, expression, and regulation of emotion. The study of emotion includes investigations of overt behaviors (such as aggression or withdrawal), interpersonal relationships, communication and decision making, and the environmental circumstances and experiences that shape and elicit emotions. Emotion research can also include the study of licit and illicit psychoactive substances that alter mood states, and conversely, the study of how emotional and mood states can predispose to, or modulate the effects of, pain or alcohol and psychoactive substances. This FOA also encourages research on emotional reactions in the context of the diagnosis and treatment of cancer, and the study of emotion as it relates to this disease or increased risk of this disease, including outcomes such as social relationships, health care provider relationships, adherence and others. Other areas of interest include: basic mechanisms of emotion; emotional processes in mental health, substance abuse, developmental disorders, neurological disorders and physical disease; individual differences; developmental, social, and/or behavioral aspects; and methodological needs.
