

Grant Title: BEHAVIORAL & INTEGRATIVE TREATMENT DEVELOPMENT PROGRAM (R01, R03, R21)

PA Number: PA-06-486; PA-06-487; PA-06-488

Area of Research: Research to improve treatment for drug and alcohol abuse and dependence.

Release Date and expiration: July 14, 2006 release; September 2, 2009 expiration.

Application Deadlines: *R01-New:* February 5, June 5, October 5 annually; *Resubmissions:* March 5, July 5, November 5 annually; *R03, R21-New:* February 16, June 16, October 16 annually; *Resubmissions:* March 16, July 16, November 16 annually; *AIDS Related:* May 1, September 1, January 2 annually.

Amount: *R01:* Up to \$250,000 or over \$250,000 using the \$25,000 modules; *R03:* Direct costs each year of \$250,000 or less, use the modular budget. For over \$250,000, follow non-modular instructions; *R21:* A combined budget for direct costs for the two year project period may not exceed \$275,000. Normally, no more than \$200,000 may be requested in any single year.

Length of Support: *R01, R03:* Up to 5 years; *R21:* Up to 2 years.

Eligible applicants: For-profit or non-profit organizations; public or private institutions, such as universities, colleges, hospitals, and laboratories; units of state and local governments; eligible agencies of the Federal government; foreign and domestic institutions; faith- or community-based organizations; units of state and local Tribal governments and organizations.

Agency/ Department: NIH; NIDA, NIAAA, NCCAM

Summary: This funding opportunity supports behavioral and integrative treatment research that will have a meaningful impact on improving treatment for drug and alcohol abuse and dependence. Behavioral and integrative treatment research has been conceptualized within a Stage Model having three stages. *Stage I* includes early treatment development and is viewed as an iterative process involving: (1) identifying promising basic or clinical concepts, methods or findings relevant to treatment; (2) generating and formulating new behavioral and integrative treatments or modifying existing treatments; (3) operationally defining and standardizing principles and techniques of the treatments; and (4) pilot testing and, if necessary, refining the treatments. *Stage II* research consists of testing of promising treatments. *Stage III* research is aimed at obtaining knowledge and methods to ensure that an evidence-based treatment will retain its potency when delivered by community treatment providers. Areas of interest for this funding opportunity includes research targeting Stage I, II, and III behavioral and integrative treatment of any drug- or alcohol-abusing population (including but are not limited to women, minorities, families, couples, specific cultural groups, adolescents, the elderly, and persons with disabilities, such as the deaf) and includes research targeting the behavioral and integrative treatment of any type drug of abuse.
