

Grant Title: EFFECTIVENESS, PRACTICE, AND IMPLEMENTATION IN CMHS' COMPREHENSIVE COMMUNITY MENTAL HEALTH SERVICES PROGRAM FOR CHILDREN AND THEIR FAMILIES SERVICE SITES (R01)

Grant Number: PA-07-091

Area of Research: Research regarding the effectiveness of interventions delivered at community mental health services sites, the nature and impact of routine prevention or clinical practice, and factors related to successful implementation of preventive or treatment interventions.

Release and Expiration: November 27, 2006 release; July 6, 2009 expiration.

Application Deadlines: *R01-New*: February 5, June 5, October 5 annually.

Amount: *R01*: Up to \$250,000 or over \$250,000 using the \$25,000 modules.

Length of Support: *R01*: Up to 5 years.

Eligible applicants: For profit and non-profit organizations; public or private institutions, such as universities, colleges, hospitals, and laboratories; units of State and local governments; eligible agencies of the Federal government; domestic or foreign institutions/organizations; faith-based or community-based organizations, Indian/Native American Tribal Government (Federally Recognized), Indian/Native American Tribal Government (Other than Federally Recognized), and Indian/Native American Tribally Designated Organizations.

Agency/ Department: NIH; NIMH, CMHS

Summary: The purpose of this funding opportunity is to support studies of the effectiveness of interventions delivered at community mental health services sites, the nature and impact of routine prevention or clinical practice, and factors related to successful implementation of preventive or treatment interventions. Conducting the proposed research at one of the Children's Services Program sites (either existing sites or "graduated" sites) is a prerequisite for funding under this FOA. Preventive and treatment services within the Children's Services Program and SS/HS sites are provided within such diverse service settings and consequently represent excellent environments in which to conduct effectiveness, practice, or implementation research. *Effectiveness research* is intended to facilitate the successful uptake of efficacious preventive and treatment intervention services into child service systems in the most efficient and cost-effective manner. *Practice research* is intended to broaden the scientific understanding of current clinical practice and to identify promising (but as of yet untested) innovative practices. *Implementation research* is intended to develop a knowledge base about how interventions are integrated within real-world practice settings.
