Summary: This program announcement encourages rigorous collaborative research proposals on drug abuse and addiction that take advantage of special opportunities that exist outside the United States. Special opportunities include access to unusual talent, resources, populations, or environmental conditions in other countries that will speed scientific discovery. Projects must have relevance to the mission of NIDA and where feasible should address NIDA's scientific priority areas. While the priorities will change from year to year, in FY06 priority areas include: linkages between HIV/AIDS and drug abuse, methamphetamine abuse, inhalant abuse, smoking during pregnancy, and drugs and driving. The research must be conducted by U.S. investigators in collaboration with non-U.S.-based investigators.
