

Grant Title: MENTAL HEALTH CONSEQUENCES OF VIOLENCE AND TRAUMA

Grant Number: PA-07-312

Area of Research: Research on the etiology of violence and trauma, as well as the development and testing of services, treatments, and prevention strategies.

Release and Expiration: January 18, 2006 release; November 6, 2009 expiration.

Application Deadline: *ROI-New:* February 5, June 5, October 5 annually; *Resubmissions:* March 5, July 5, November 5 annually.

Amount: *ROI:* Up to \$250,000 per year requested in \$25,000 modules or over \$250,000 per year in direct costs.

Length of Support: *ROI:* Up to 5 years.

Eligible applicants: For-profit and nonprofit institutions, public or private institutions (universities, colleges, hospitals, and laboratories), units of State and local governments, agencies of the Federal government, domestic and foreign institutions and organizations and faith-based & community based organizations.

Agency/ Department: NIH; NIMH

Summary: This funding opportunity supports research to enhance scientific understanding about the etiology of psychopathology related to violence and trauma, as well as studies to develop and test effective treatments, services, and prevention strategies in this area. Research goals may include basic, clinical, and genomic studies of the mental health consequences of traumatic stress and the development and testing of interventions to assist victims and survivors. Major areas of interest for the NIMH include research assessing acute responses to trauma, risk for long-term adjustment problems, translational research to better understand early experiences, emotion regulation, and the development of stress-sensitive neurobiological systems and their relevance as targets for preventive interventions. Research in these areas will improve the ability to predict who is at greatest risk for developing mental disorders and what is the optimal time to intervene and how.
