Agency/ Department : NIH, NIMH

Summary: This funding opportunity supports translational research on the nature of the association between anxiety and depression. This funding opportunity was designed to encourage innovative, translational research that will expand current theories, conceptualizations, and knowledge of the affective, biological, cognitive, behavioral, social, and developmental mechanisms of the co-occurrence of disorders of anxiety and depression. NIMH seeks applications that will test novel methods for ascertaining these mechanisms and that will apply existing information to improve assessment and treatment development. Some areas of basic science areas that might be relevant are: affect, interpersonal processes, learning, memory, neurophysiology, psychobiology, psychophysiology, temperament.
