**Length of Support:** 1 year or multi-year

**Eligible applicants:** Tax-exempt under IRS code 501 (c) 3 higher education institutions, community colleges and vocational or trade schools, nonprofit organization engaged in pre-collegiate math and/or science education. Not eligible are government agencies, individuals, and for-profit businesses.

**Agency/ Department:** Toyota USA Foundation

**Summary:** The foundation aims to support innovative programs that improve the teaching and learning of mathematics and science. A high priority is placed and systemic math and science programs broad in scope of interdisciplinary curriculum, “real world” classroom applications, high student expectations, creative programs that develop teacher and student skills, and cost-effective programs with a high potential for success with low duplication effort. Proposals are evaluated on significance of problem/need, potential of program for overall effectiveness of the system, long-term success, resourcefulness, scale of project within community or geographical region, and the ability to establish partnerships. Grants are used to support the development and implementation of programs. Grants will not provide for routine expenses, endowments, deficit reductions, fundraising, conferences, meals, travel, publication, or advertising.
